

Tomi Babjak

Senior Full-Stack / Product Engineer · Prague, Czechia
babjatom@gmail.com · github.com/babjatom · tomibabjak.dev

Summary

Senior full-stack engineer with 10+ years shipping web products and leading small teams (PropertyGuru, Elitebrains, Plots). Strong in React/Next.js, TypeScript, Node.js/Go, cloud (AWS/GCP), and production reliability. Recently focused on AI-assisted engineering workflows (agents for specs → implementation → QA) and shipping Ask Tomi, a persona-grounded AI interview assistant (Cloudflare Workers + React). Looking for a Product Engineer role owning surfaces end-to-end — including agent UX, approvals, and auditable runs.

Selected impact

- **Ask Tomi (2026)** — Shipped an AI Q&A; product: Workers AI pipeline, session follow-ups, rate limits, Slack notifications, public React UI; spec-first Gherkin + Vitest.
- **AI-assisted delivery (Plots)** — Embedded agents into the workflow: draft Gherkin → implement → QA assists; human review on the path to production.
- **Elitebrains assessment platform** — Technical screening: AI-generated coding questions, React assessment UI, Node paths, self-hosted Judge0 on GKE with monitoring and cost-aware autoscaling.
- **PropertyGuru** — Image-compliance pipeline with DS (score → review → gradual enforce); geo schema work across ~20M+ building records with minimal downtime.

Experience

Plots Inc — Los Angeles (remote) — Full-Stack Engineer · 2024–2026

React, Next.js, TypeScript, Go, AWS (Lambda, AppSync), DynamoDB, Postgres, GraphQL, Tailwind, Mixpanel

- Built and maintained full-stack public/event pages and internal analytics dashboards.
- Migrated Next.js major version while preserving critical ROI UI; Mixpanel on those paths through redesigns.
- Shipped redesigned onboarding and event pages; expanded unit/E2E coverage across Go and React/Next.
- AI-assisted engineering: agents for Gherkin → implementation → QA assists; tightened production rules after an unreviewed AI/stale-branch incident.

Elitebrains.com — Prague — Web Engineer / Tech Lead · 2021–2024

React, Next.js, TypeScript, Node.js, Express, Symfony, MongoDB, MySQL, GCP, Judge0 (GKE)

- Led engineering for an HR technical screening / coding assessment platform.
- Product loop: AI-generated coding questions → self-hosted Judge0 on GKE; React UI + Node integration into existing PHP stack.
- Owned technical strategy and SDLC; GCP/bare-metal with cost-tuned autoscaling for bursty assessment load.

PropertyGuru.com.sg — Singapore — Tech Lead & Web Engineer · 2017–2021

React, Redux, TypeScript, Nest.js, Symfony, MongoDB, MySQL, GCP, AWS

- Led a 4-person Agile team (listings stats, supply/demand, user management).
- Partnered with Data Science on image recognition / compliance; multi-step AWS pipeline (score → review → gradual enforce, Redis).
- Multi-country geo schema change for ~20M+ building records; careful country rollouts.
- Extracted critical paths from legacy PHP into independently deployable Node.js services; modernized frontend (React, Storybook, MUI, TS).

Rabbit Finance — Bangkok — Web Engineer · 2014–2017

Node.js, TypeScript, PHP/Laravel, MongoDB, PostgreSQL

- Led small team on financial product comparison and call-center CRM.
- Overnight MongoDB → PostgreSQL cutover (~500k customers, ~1M products) with dual-run/fallback so public comparison stayed up.

BeatBeat — Prague — Co-founder & Web Engineer · 2012–2014

Streaming apps, APIs, fundraising

- Music streaming apps from zero; investor pitches.

CLEEVO — Prague — Web Engineer · 2010–2012

C#, JavaScript, browser extensions

- Cross-browser extensions (IE, Chrome, Firefox).

Projects

Ask Tomi / tomi-interview-bot — tomibabjak.dev — Persona-grounded interview Q&A;: Cloudflare Worker + Workers AI, session memory, rate limits; React GitHub Pages UI. Spec-first Gherkin + Vitest.

Tomi Playground — React SPA: Ask Tomi chat, theming, analytics; clean architecture-style layers, Conventional Commits.

Skills

Product / FE: TypeScript, React, Next.js, Redux, Tailwind, Storybook, Mixpanel

BE: Node.js, Express, Nest.js, Go, GraphQL, Python

Data: Postgres, MySQL, MongoDB, DynamoDB

Cloud: AWS (Lambda, AppSync), GCP, Docker, GKE, Cloudflare Workers, GitHub Actions

Practices: Spec-first (Gherkin), Vitest/E2E, DDD / clean boundaries, observability

AI (honest): AI-assisted coding & agent workflows; shipped Ask Tomi; assessment-question generation + Judge0 eval platform

Education

Czech Technical University, Prague · 2009–2013
